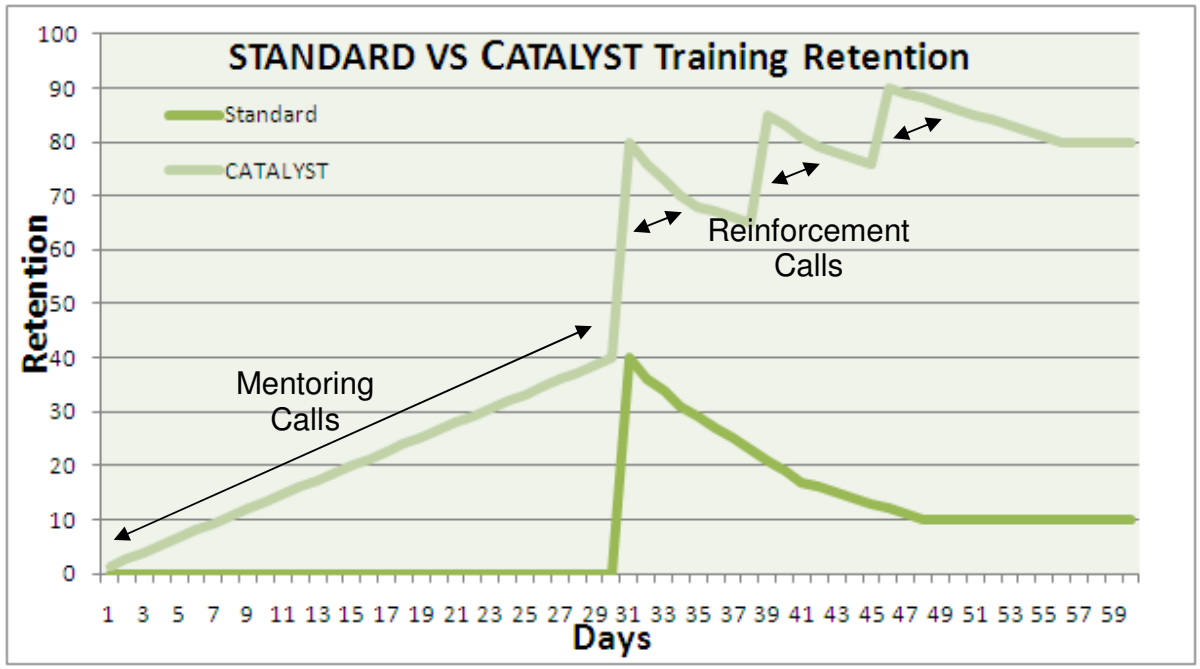
Microsoft Project CATALYST



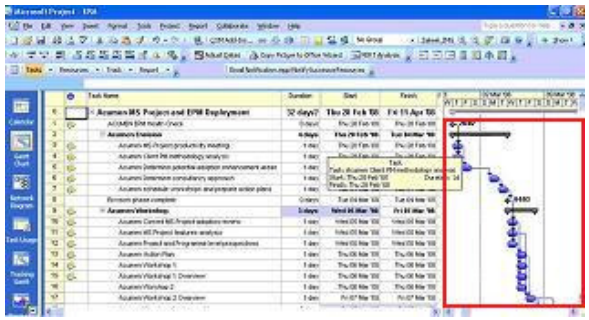
Acumen uses a powerful approach to training that guarantees proficiency – the Acumen **CATALYST**. **CATALYST** prepare delegates via pre-course mentorship to accelerate learning. Preparation ensures readiness for intensive, high-paced training that significantly increases retention (standard course retention is typically 20%, while pre-course preparation increases retention to above 85%.) This style of training exponentially increases the ability of IT professionals to design, implement, maintain and troubleshoot reliable, secure and effective systems.

CATALYST Microsoft Project Certifications:

MCTS: Microsoft Office Project 2007, Managing Projects

MCITP: Microsoft Office Project Server 2007, Managing Projects and Programs CATALYST

"Acumen, aligning project management with business"



Acumen.
